235 messages later

Apr 16 · the plan changes

User A: Let's meet at 7:30 am on May 1 for now.

User D: How about leaving on Apr 30 to avoid the May 1 rush? About ¥50 more each.

User B: Rule: whoever doesn't show up on departure day sends the group ¥500 cash gift.

User A: No objections, so approved: we leave on Apr 30, +¥50 each.

User C: @Agent on departure day, remind the no-shows to pay up.

User E: A window seat, not squeezed in the middle, would be great for me.

Current Value

Memory Recall vs Use

A L1 × M2: Memory Recall for Group

Q (#104): @Agent on departure day, remind the no-shows to pay up.

Atomic Reference

☒ Meet at 7:30 am on May 1 (#34)

☒ Whoever doesn't show up pays the group ¥500 (#35)

B L2 × M3: Memory Use with Conflict

Q (#452): @ Assistant Post a reminder on ticket booking and travel costs.

Point-based Rubric

 **+2 grounding:** leaves on Apr 30 (#342); Chongqing→Chengdu by railway (#343)

 **+3 grounding:** User E wants a window seat (#363); costs count all nine travellers (#372)

 **-2 penalty:** answers with the superseded May 1 (#34)
